P 1 203 535 5556

W jp-harris.com

G github.com/thatjp

Creative front end web developer with background in art and design. I bring a inventive attitude and open mind to every project. My past work experience has given me strong team and project management skills. In my free time, I work on music production and studio arts.

Projects

React/Redux Example - <https://jp-example.herokuapp.com/>

- Small React, Redux and SASS project.
- Utilizes the Bootstrap library for styling.
- Reaches out to the Instagram API to bring in results for specific users.

Sandbox - <https://front-end-sandbox.herokuapp.com/>

- Designed to test out UI features such as SVG transforms and three.js.
- Incorporates a parallax design with button based scrolling.
- Implements the WebAudio API.

GOT Map - <https://got-map.herokuapp.com/>

- A node application built to show characters and houses of Game of Thrones to the uninitiated
- Fetches form the Game of Throne via the fetch API
- Semi responsive map that can store
